**Personal:-**

DOB:- March 4, 1993
Nationality:- Indian
Address:- A/9, Sulabh Flats, Mirambica School Road, Naranpura, Ahmedabad-380013
Languages:- English, Hindi, Gujarati
Marital Status:- Single

**Education:-**

Bachelor of Information Technology, Gujarat Technological University, Gandhinagar Institute of Technologies, 7.93 CGPA (2014)

**Interests and activities:-**

**Awards and Certificates:-**

**Work Experience:-**

**Sooryen Innovation Labs Pvt. Ltd.**
Start month till now
Software Developer

**Projects**

1) **500BC:-**
   A mobile app that revolves around personal happiness, helping users navigate the game of life, on a smartphone. An app that would be built to run on iOS and Android in the same way so users can seamlessly switch between devices without losing their Zen.
   We have used the "Ionic" – framework for app development, enabling a common framework for iOS and Android development. Code once, port twice and 'compatible by

design'. Instead of building two separate native apps that needed to be kept synchronized. We have used a hybrid framework that enabled us to build the 500 BC app with a small, agile and compact team. We have  also integrated "Kahuna" for push notifications, MySQL as a database and employed Amazon Web Services Elastic Load Balancer for distributing app traffic. Working closely with the customer, with ideation from 500 BC and technology from us, the 500 BC app was launched within the tight deadline.

**Key functions & achievements:**

- Client Communication
- Development of the application using ionic framework
- Database design and interaction
- Implementation of AWS for load balancer

**Technologies used:-**

- Ionic framework
- Angularjs
- HTML
- CSS
- MYSQL

**More information:-** http://sooryen.com/case-study/500BC

2) **OTC:-**

Oriental Trading Company (OTC) to integrate their Order Management System (OMS) with Target.com, one of their biggest customers, for a seamless Order Management experience across the two companies.

EDI data coming from Target.com (EDI 850, EDI 860) needed to be translated for OTC (Json 850, Json 860). Since the EDI formats needed to be transformed at runtime between the systems at Oriental Trading Company and Target, the Sooryen Technologies team implemented the format transformation using a process deployed on Dell Boomi Atom Cloud.

Dell Boomi provides a Graphical User Interface (GUI) to develop Atoms, which can then be deployed directly to their cloud. Also Dell Boomi offers a REST API to support Web Service calls with OTC and an AS2 server to support the interface with Target.com. The Atoms developed by Sooryen transform formats from JSON to ASC X12 and also from ASC X12 to JSON enabling Electronic Data Interchange in both directions.

**Key functions & achievements:**

- Client Communication

- Development of the software using HTML/CSS, Jquery/Javascript
- Database design and interaction

**Technologies used:-**

- HTML
- CSS
- jQuery/JavaScript
- Java

3) **Cafe Learn:-**

Cafe Learn increases student success with a cloud-based platform that enables schools to evolve teaching and learning. Instructors can easily create, share and customize blended, social, and personalized course experiences—with complete content flexibility. The first platform that is centered completely on student success—providing faculty with real time data on student mastery of measurable outcomes. The new learning model of the future is blended—where learning is active, with peer to peer instruction that is supported with digital tools.

**Key functions & achievements:**

- Client Communication
- Development of the software using HTML/CSS, Jquery/Javascript, Ruby on Rails
- Database design and interaction

**Technologies used:-**

- HTML
- CSS
- jQuery/JavaScript
- Ruby on Rails
- MySql

**Technical knowledge and skills :-**

**Languages**

- **Proficient in:** JavaScript & DOM, CSS, HTML5, Ionic(Hybrid framework for mobile) , Angularjs, Swift, PHP, Adobe Photoshop
- **Databases & Data stores:** MongoDB, MySQL
- **Source Code Control:** GIT, CVS
- **Operating Systems:** Linux (Red Hat / CentOS, Debian),  Windows, Mac

- **Web MVC frameworks:** Familiar with Ruby on Rails, Familiar with Laravel (Yes It Is - MVC PHP framework)
- **IDE / Debugging experience:** xCode,Eclipse, Android studio 2
- **Amazon Web Services Cloud technologies:** EC2, S3, RDS, CloudWatch, Simple Notification Service, API gateway, SES

**Professional assets :-**

1. Practical & pragmatic problem solving skills
2. Strong ambition for meeting deadlines
3. Proactive thinking
4. Leadership skills
5. Highly self motivated / Goal Driven / Result Oriented
6. Lateral Thinking
7. Ability to adapt to changing trends, technology and general working environments - I've been described as an quick learner
8. Excellent communication / Interpersonal / Social skills
9. Strong judgment
10. Strong will to learn and adapt
11. Desire for practical perfection
12. High level of creativity
13. Persistent
14. Able to work and make decisions under pressure.
